

Volume Two

THE URBAN GEOGRAPHY OF THE HEART OF A CITY:

WITH SPECIAL REFERENCE TO EDINBURGH

VOLUME II: ATLAS

M.F. HUQ, M.A. (Calcutta)

Dissertation submitted to the University of Edinburgh
in candidature for the degree of Doctor of Philosophy,
May, 1960.

Volume Two

This volume contains the maps and diagrams, which have been referred to in the main thesis. The maps that are drawn for 1750, 1800, and 1834 are based mainly on the information of Postal Directories, and other Gazetteers published in those years. Previous to 1855 there was no official compilation of City Valuation Rolls of Edinburgh, therefore 1855 has been considered as a reliable source of information to ascertain the land-use of that period. The land-use maps of 1855, 1875, 1900, 1925 and 1957 have been based mainly on the information of City Valuation Rolls as well as Postal Directories of Edinburgh and Leith in those respective years. Maps have also been drawn showing the location of different types of establishments in those years. The different types of commercial and non-commercial establishments are listed on the next page.
